the Six Men on a Hockey Team

what they do

Goalkeeper

The goalkeeper's main responsibility is to keep the puck from entering the goal and there are no restrictions placed on the methods he can employ. His offensive contributions are limited and consist of occasionally passing the puck up to his defensemen or forwards to start a rush. A goalkeeper never scores a goal and only on rare occasions does he receive credit for an assist.

Defensemen

Basically the two defensemen try to stop the incoming play at their own blue line. They also block shots, clear the puck from in front of their goal and watch the opposing forwards. Offensively they carry the puck up the ice or pass the puck up to the forwards, then follow the plan into the attacking zone and help to keep it there.

Center

The center operates mostly up and down the middle of the ice and usually leads his team's attack by carrying the puck. He sets up plays by exchanging passes with his two wingmen and tries to steer the play in towards the opponent's goal. Defensively he tries to keep the play in the attacking zone by harassing the opponent's puck carrier. (Forechecking) After the opposition works the puck out of their end of the rink, he tries to interrupt their playmaking as it moves through the neutral zone and into his defending zone. (Backchecking)

Wings

The two wings move up and down the sides of the rink with the direction of play. Offensively they skate abreast of the center exchanging passes with him while positioning themselves for a shot on the goal. Defensively they watch the opponents wings and try to disrupt their playmaking and shooting as the action moves back towards the defending zone. (Backchecking)
